

ABOUT WICET?

WICET IS A WORLD-CLASS, PRIVATELY FUNDED COAL EXPORT TERMINAL THAT SUPPORTS QUEENSLAND'S RESOURCES SECTOR AS A SUSTAINABLE CONTRIBUTOR TOWARDS ECONOMIC PROSPERITY.

 WICET is a \$4 billion investment owned and funded by:

AQUILA RESOURCES
GLENORE COAL
CORONADO CURRAGH
YANCOAL

 WICET exports quality Queensland thermal and metallurgical coals through the Port of Gladstone, sourced from the Southern Bowen Basin.

 WICET is committed to owning and operating a modern coal export facility in a safe, environmentally friendly and socially responsible manner.

We employ a small team of local, permanent employees to operate the Terminal and increase the region's coal export capacity in a manner that is respectful to the local community and environment.

WICET's potential to be one of the largest terminals of its kind – with modern technology assisting in the competitive export of Queensland coal meeting high environmental standards.

WICET and the Environment

- Covered conveyors to reduce noise and dust
- Automated placement of coal on stockpiles to reduce dust
- Vegetation offsets established to maintain natural flora and fauna systems
- Water management system for stormwater harvesting and water recycling
- Rail receipt located north-west of Gladstone to reduce impact on the community
- Protected flora species relocated to alternative local sites for preservation

Terminal Performance

- Each stockpile can be up to 18m high with total stockyard capacity of 1.85Mt
- Overland conveyor – 5.6km, belt width 1,800mm, belt speed 6.9m/s
- Gantry system spans two stockyard rows with two 125m wide travelling bridge sections
- Loading rate – 8,250tph
- Unloading Rate – 8,250tph

As a member of the Gladstone community, we are committed to reducing our environmental footprint and impact on our neighbours.
